

Sumit K C

Full-Stack Developer

sumitkc74@gmail.com | [LinkedIn](#) | Seattle, WA | +1 (425) 545 4816

Professional Summary

Full-stack developer with experience building production web platforms, cross-platform mobile apps, and AI-powered systems. Currently pursuing an M.S. in Computer Science at City University of Seattle while supporting 300+ students across technical infrastructure and lab curriculum for graduate-level courses.

Experience

City University of Seattle

Seattle, WA

Graduate Teaching and Systems Assistant

October 2025 – Present

- Built and maintained lab curriculum in Python, AWS, ML algorithms, and React, supporting 300+ students across 6–7 courses per quarter.
- Rebuilt AWS and LMS environments for 3 graduate courses, cutting recurring setup failures to near-zero within the first 2 weeks of each quarter.
- Resolved a misconfigured grading integration affecting 120+ students, restoring accurate reporting within 24 hours with no repeat issues.

Aankhijhyal Technologies

Pokhara, Nepal

Full-Stack Developer

June 2023 – November 2024

- Delivered 15+ client web platforms end-to-end, writing custom PHP, JavaScript, and hand-coded themes instead of prebuilt templates.
- Cut page load times by ~40% on 5+ platforms through plugin audits, asset optimisation, and server-side caching.
- Integrated 3 third-party REST APIs, including payment and booking systems, cutting manual order processing time by an estimated 5+ hours per week.

Full-Stack Developer Intern

September 2022 – November 2022

- Delivered 3 production deployments in 3 months with zero post-launch issues; cut setup time per project from ~3 hours to under 1 hour.

Projects

MealMate.ai – AI-Powered Meal Planning Platform

- Built a 3-tier app (React, Node.js, FastAPI) with a hybrid recommender (TF-IDF, LSA, collaborative filtering) that consistently placed the right recipe among its top 5 results during testing; backed by 128 passing tests via CI.
- Integrated Google Gemini for cooking assistance, pantry parsing, and vision-based ingredient capture, with deterministic offline fallbacks across all AI features.

Learn to Drive – Driving Test Preparation Platform

- Built a full-stack driving test prep platform with a Laravel backend serving a REST API, admin panel, learner web experience, and scheduled jobs — all consumed by a Flutter mobile client.
- Structured driving test content into category-based modules across the mobile app, enabling organised offline exam prep with test papers, quizzes, and traffic symbols.

Technical Skills

- Languages:** Python, Java, C#, PHP, JavaScript, TypeScript, R, Dart, SQL
- Frameworks:** Flutter, Laravel, React, Node.js, Express
- Data Science/ML:** TensorFlow, scikit-learn, Pandas, NumPy, Matplotlib, Posit (RStudio)
- Cloud/Tools:** AWS (EC2, S3, Lambda), Docker, Git, REST API, HTML, CSS, MySQL, PostgreSQL, MongoDB, Agile, Scrum
- AI Tools:** Claude Code, GitHub Copilot, ChatGPT, Gemini

Education

City University of Seattle

Seattle, WA

M.S. Computer Science, GPA: 4.0/4.0

January 2025 – Current

- Dean's List [Winter 2025 – Spring 2026]

Informatics College Pokhara

Pokhara, Nepal

B.S. Computing (Affiliation: London Metropolitan University)

March 2020 – December 2023

- Graduated top of the cohort; awarded Letter of Commendation | AAA Excellence Scholarship Recipient

Certifications

- Microsoft Certified: Fabric Data Engineer Associate
- Microsoft Certified: Azure Administrator Associate
