Sumit K C

Full-Stack Developer
Seattle, WA | +1 (425) 545 4816 | sumitkc74@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Full-stack developer with experience building production web platforms, cross-platform mobile apps, and AI-powered systems. Currently pursuing an M.S. in Computer Science at City University of Seattle while supporting 300+ students across technical infrastructure and lab curriculum for graduate-level courses.

Experience

Graduate Systems and Teaching Assistant October 2025 - Present
City University of Seattle Seattle, WA

- Resolve programming and lab environment issues in Python, AWS, React, and machine learning, supporting 300+ students across 6 to 7 courses per quarter.
- Rebuilt AWS and LMS environments for three graduate courses, reducing setup failures to nearly zero and restoring usable lab environments.
- Corrected a grading integration issue affecting 120+ students, restoring accurate reporting within 24 hours.

Full-Stack Developer June 2023 - November 2024
Aankhijhyal Technologies Pokhara, Nepal

- Delivered 15+ client web platforms using PHP, JavaScript, and WordPress; helped streamline requirements gathering to shorten project delivery time by 15%.
- Reduced page load times by approximately 40% across 5+ platforms through plugin audits, asset optimization, and server-side caching.
- Integrated three payment and booking REST APIs to automate workflows, saving approximately five hours of manual processing per week.

Full-Stack Developer Intern September 2022 - November 2022
Aankhijhyal Technologies Nepal

- Contributed to three production deployments with no reported post-launch issues; configured development environments and cut project setup from approximately 3 hours to under 1 hour.

Projects

MealMate.ai - AI-Powered Meal Planning Platform

- Contributed to a team-built React, Node.js, and FastAPI app with a hybrid recommender (TF-IDF, LSA, collaborative filtering) that placed the right recipe among its top 5 results during testing; backed by 128 passing tests via CI.
- Team features include Gemini cooking assistance, pantry parsing, vision-based ingredient capture, and deterministic offline fallbacks.

Learn to Drive - Driving Test Preparation Platform

- Built a Laravel/MySQL platform with REST APIs, an admin panel, learner web experience, authentication, and Flutter mobile integration.
- Developed question management, mock examinations, government notice management, and application configuration for driving test preparation.

Parallax-Eval - Cross-Lingual AI Safety Evaluation

- Developed English/Nepali LLM safety evaluation using Python, FastAPI, LangGraph, and policy-grounded RAG.
- Implemented Judge-Critic-Arbiter agents, experiment orchestration, automated tests, and statistical comparisons.

Skills

Languages: Python, Java, C#, PHP, JavaScript, TypeScript, R, Dart, SQL, HTML, CSS
Frameworks: Flutter, Laravel, React, Next.js, Node.js, Express, FastAPI, Flask
Data Science / **ML**: TensorFlow, scikit-learn, Pandas, NumPy, Matplotlib, Posit (RStudio), LangGraph, RAG
Databases: MySQL, PostgreSQL, MongoDB, SQLite
Cloud / **Tools**: AWS (EC2, S3, Lambda), Docker, Git, GitHub Actions, REST APIs, Agile, Scrum
AI Tools: Claude Code, GitHub Copilot, ChatGPT, Gemini

Education

City University of Seattle Seattle, WA
Master of Science in Computer Science, GPA: 4.0/4.0 January 2025 - December 2026 (expected)

- Dean's List: Winter 2025 - Spring 2026

Informatics College Pokhara Pokhara, Nepal
Bachelor of Science in Computing (London Metropolitan University) March 2020 - December 2023

- Class Topper (75%); Letter of Commendation; AAA Excellence Scholarship Recipient

Certifications

Microsoft Certified: Azure AI Fundamentals | Azure Administrator Associate | Fabric Data Engineer Associate
